

專 題 演 講

演 講 者：Prof. Tosh YAMAMOTO(Kansai University, Japan)

演講題目：Current Issues in Digital Teaching and Learning

演講摘要：

Based on his last 15 years of experience making use of Information Technology in the higher education, the speaker would like to share his views with the graduate students at NCU.

The talk will cover various aspects of the development/research in Information Technology including the following:

1. Developmental Model: Stanford U's development model
2. Development for the major benefit of whom?: Realm and its stakeholders
3. Active Learning defined! - How is it related to ePortfolio?
4. How to implement active learning into eL as well as into ePortfolio (also a part of the topic #2 above)
5. Jef Raskin & Apple Computer :
6. Clark and Kozma Debate for Open Discussion
