題 目：Road to Open Source: SideeX Web Testing Software

摘 要：

Test case recording and playback technology, normally implemented as a test case recorder, has been widely applied in the industry in web testing domain. Our team developed an open source web testing software, SideeX, which has been adopted as a basis for developing the next generations of the most popular web testing tools, Selenium IDE and Katalon Recorder. Currently, over 60,000 web testers around the world run SideeX code. This talk shares the experience and lessons learned on developing and distributing this software.

簡 介：

Shin-Jie Lee (李信杰) is an Associate Professor in Computer and Network Center at National Cheng Kung University (NCKU) in Taiwan and holds joint appointments from Department of Computer Science and Information Engineering at NCKU. His current research interests include software engineering and service-oriented computing. He received his Ph.D. degree in Computer Science and Information Engineering from National Central University in Taiwan in 2007.
